GOB

WHITEPAPER

Play-To-Earn Game on BNB

presented by GOB Team| 2025
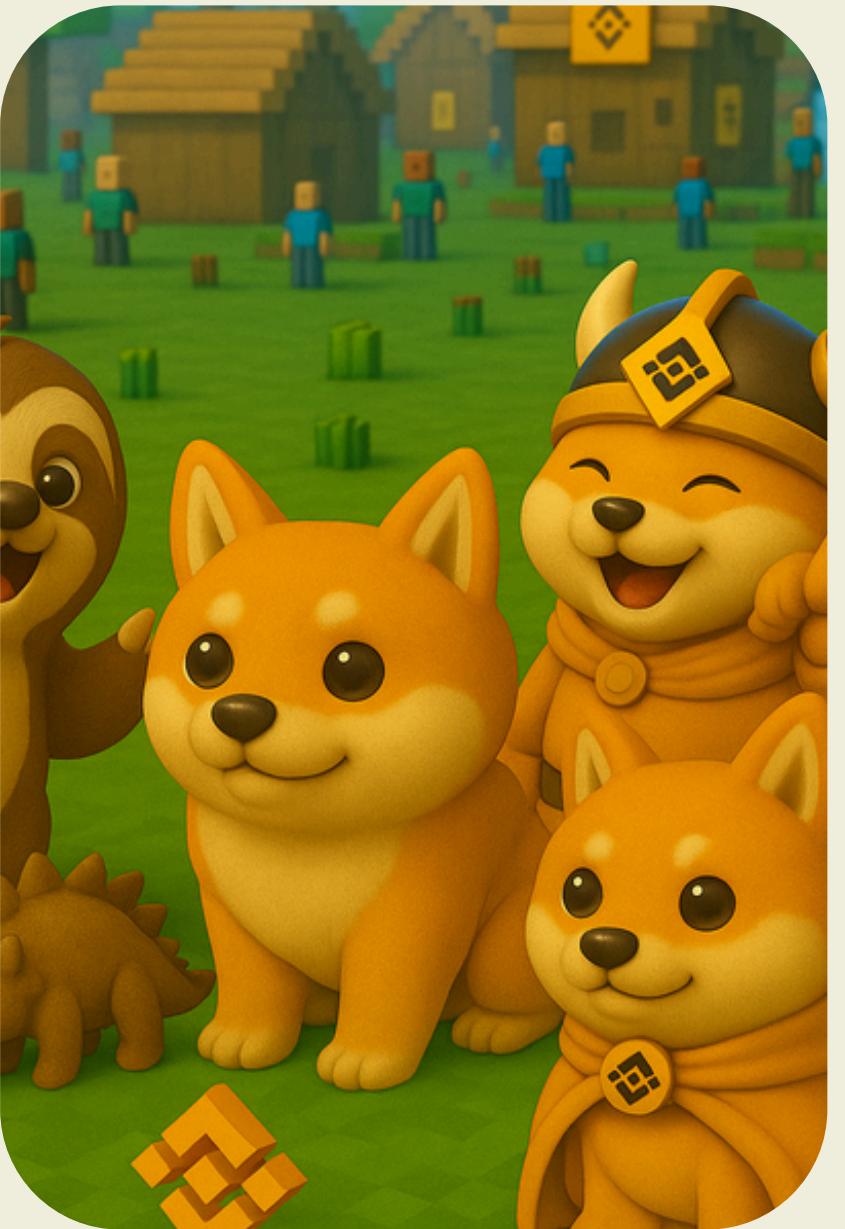

WELCOME TO GOB

EXECUTIVE SUMMARY

GAME ON BNB IS A DECENTRALIZED STRATEGY GAME BUILT ON THE BNB CHAIN.

Players embark on an adventure where they build cities, form alliances, and engage in fierce battles for dominance. The game features crypto-animal characters, each inspired by popular meme coins and cryptocurrencies, adding a unique twist to the traditional strategy game format. By leveraging blockchain technology, GOB offers true ownership of in-game assets, transparent rewards, and a fully player-driven economy.

Players start with a small settlement and gradually build a city by gathering resources, constructing buildings, and upgrading infrastructure. Players can upgrade their animals and creatures, unlock new characters, and develop their cities into mega-metropolises. Players earn $GOB rewards through battles and city management, creating a direct incentive for active participation.

Build your city, battle for territories, and lead crypto-animal characters (inspired by Dogecoin and Shiba Inu, Floki , etc) into epic, turn-based battles. By combining tactical gameplay, crypto-animal characters, and a decentralized economy, we offer players an immersive experience

GAME OVERVIEW

GOB: GAME ON BNB is a decentralized, strategy-based play-to-earn game built on the BNB Chain, offering an immersive gaming experience powered by blockchain technology. It enables players to engage in tactical combat, city-building, and resource management while earning $GOB tokens as rewards.

Players can choose from a wide variety of crypto-animal characters, each with unique abilities and stats, and participate in strategic battles for control of territories. With a robust in-game assets such as characters, resources, and cities are tokenized, allowing players to trade, stake, and own assets with true decentralization.

GOB's ecosystem incorporates automate rewards distribution, ensuring an efficient, trustless gaming environment. Designed to provide a seamless connection between gaming and cryptocurrency, GOB offers a cutting-edge platform where players can not only enjoy entertainment but also benefit from real-world rewards and ownership.

GOB CRYPTO CHARACTERS

We've brought together 10 best crypto-related characters, each reimagined in our unique style to give players the ultimate gaming experience. From Dogecoin to Shiba Inu, these iconic crypto characters come to life with their own abilities, stats, and personalities, ready to battle and conquer.

CORE FEATURES

In-Game Economy
$GOB Token: The in-game currency, $GOB, can be earned through strategic gameplay, traded, and used to purchase in-game assets.
Passive Income: Players can stake $GOB tokens to earn passive rewards and unlock higher-tier animals.

Crypto-Animal Characters
Unique Characters: Players can choose from a wide range of crypto-animal characters, each inspired by popular tokens (e.g., Dogecoin, Shiba Inu). Each animal has unique traits, powers, and stats based on their crypto identity.
Leveling Up: Characters can be leveled up, enhanced, using blockchain-based assets.

Building the Infrastructure
Tokenized Cities: Players start with a small settlement and gradually build a city by gathering resources, constructing buildings, and upgrading infrastructure.

CORE FEATURES

Combat System
Turn-Based Strategy: Battles take place on a grid map. Each animal has unique abilities based on their crypto identity.
Tactical Decisions: Players must anticipate their opponents' moves, use terrain strategically, and maximize animal abilities to win.
Staked Battles: Players can stake tokens before battles, increasing the risk and rewards for victorious teams.

Quests & Missions
Daily Challenges: Engage in quests that involve gathering resources, completing special tasks, and winning battles.
Global Events: Participate in global events tied to crypto trends, offering exclusive rewards like rare animals and limited-edition NFTs.

Transparent Rewards
All $GOB rewards earned through gameplay are distributed based on verifiable smart contracts, ensuring fairness and trust in the system.

Getting Started
Connect Wallet: Players connect their crypto wallets (MetaMask, Trust Wallet) to the game to start playing.
Character Selection: Choose an initial crypto-animal character and begin with a starter city.
Tutorial: A built-in tutorial will guide new players through the process of building cities, managing resources, and engaging in battles.

City Management
The city dashboard allows players to view and manage their resources, structures, and animals.
Resource Gathering: Collect resources like crypto ores, NFT items, and animal tokens to upgrade your city and army.

Strategic Gameplay
Players engage in real-time strategy by choosing which territories to conquer, which alliances to join, and which enemies to fight.

Rewards and Progression
Players earn $GOB tokens by completing missions, winning battles, and advancing through the game.

Leveling System
Players can upgrade their animals, unlock new characters, and develop their cities into mega-metropolises.

GOB ROADMAP

PHASE 1

1. Concept development and team assembly
2. Early game prototype and character design
3. Launch of community-building efforts and marketing

PHASE 2

1. Beta version launch
2. Alpha testing for battle mechanics and city-building.
3. Staking Launch
4. Marketing campaigns and giveaways

PHASE 3

1. Full public launch
2. Implementation of NFT Marketplace
3. Strategic alliances and player-driven events
4. Collaborations with gaming projects

PHASE 4

1. Expanding the game world with new regions
2. Continuous development of new characters and missions
3. Partnerships with crypto brands for cross-promotions and special in-game events
